

The South Farmingdale Water District has been maintaining and delivering an uninterrupted supply of the highest quality water to customers since 1931.

To that end, we ensure public health and safety, actively promote the conservation of our most precious resource, cooperate with all local and New York State authorities, and pledge to fulfill this mission in an efficient, economical and environmentally sound manner. It is our goal to provide reliable customer service and fire protection to our community, 24 hours a day, 7 days a week.

Your Neighborhood Water District Does It Best!

Come Out and Vote

The South Farmingdale Water District's annual election is
Tuesday, December 8, 2009 from 4 to 9 pm.
Voting will take place at the North Massapequa Fire
Department headquarters, located at Broadway and Albany
Avenue; and the South Farmingdale Fire Department
headquarters, located at 819 South Main Street.

Free Backflow Testing for SFWD Residents!

Backflow testing is mandated by the State of New York under New York State sanitary code. Therefore, it is our intention to have all lawn irrigation backflow systems in the District tested annually. As a commitment to this goal, we are offering our consumers free testing. Learn more about backflow and our program at www.sfwater.com.

BOARD OF WATER COMMISSIONERS

From The Desk Of... Charlie Prucha, Superintendent

We hope everyone has been enjoying the fall weather as the holiday season is quickly approaching. As always, the District is doing our part to 'Be Green' and conserve wherever possible.

South Farmingdale Water District offers several suggestions on our website (www.sfwater.com) to help promote water conservation and specific green initiatives within our homes and community. One example of how you can go green is to switch to tap water instead of purchasing bottled water. If you think about it, designer water comes from the same aquifers as regular tap water. So here's a great way for you to save money, protect the environment from plastic bottles and skip out on buying bottled water.

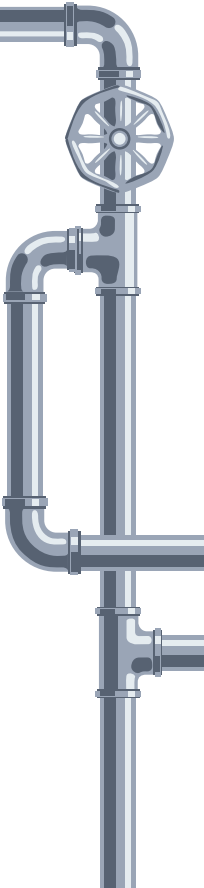

For the last year, the SFWD has been providing residents with FREE water bottles to fill up with great tasting tap water.

Savings to the consumer can be immense. The average consumer pays about \$1.46 for a 20-ounce bottle of water from a convenience store. By comparison, \$1.25 pays for about 1,000 gallons of water from the SFWD tap. Using those figures, 1,000 gallons of bottled water would cost \$9,344. So come down to our office and pick up your FREE water bottle today!

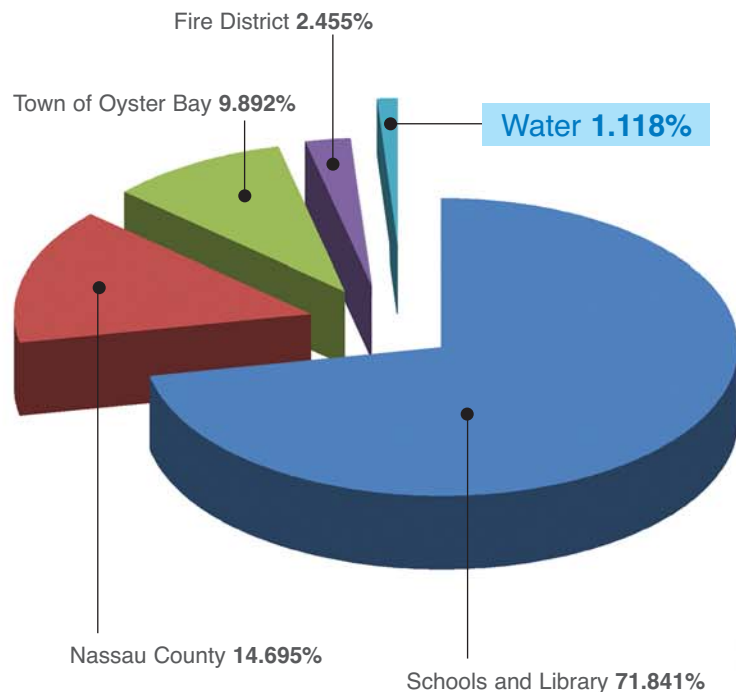

Winterizing Tips During the Fall and Winter Seasons:

- If water pipes are located in an unheated area of your house, cover the pipes with insulation to prevent freezing.
- Disconnect all outdoor hoses, turn off the water leading outdoors and open each outdoor faucet.
- Know where your shut-off valve is located in case of emergency.
- Keep any fire hydrant on your property clear of snow.
