### **South Farmingdale Water Plant No. 3 Improvements**

*Dear Neighbor:*

*Starting in mid-October, South Farmingdale Water District (SFWD) will be installing a new water treatment system at the Plant No. 3 site, which is adjacent to, or near your home. The construction of this new treatment facility is necessary for SFWD to continue to provide water that meets and exceeds all local, state and federal regulatory standards. This project is on the fast track as it is important to have the well in service for next year's summer months. Summer is the season of our highest water demand and will require us to have Plant No. 3 at the ready.*

*The treatment system will be housed in a building that will match the buildings already located on the property. Besides the building and the treatment equipment inside the building, we will be installing some new underground piping on the property. During certain times of construction, heavy machinery will be in operation.*

*Thank you for your cooperation and patience during this important infrastructure improvement and we want to extend to you every courtesy during this project. If you need to contact us or to learn more about the project in detail, don't hesitate to call our headquarters and we'll be happy to speak with you.*

*Sincerely,*

*Francis J. Koch, P.E.  
Superintendent*
